

WEATHER WATCH

OUTLOOK FOR THE NORTHWEST SAN JOAQUIN VALLEY South of Highway 132 to Los Banos & West of the San Joaquin River PREPARED BY METEOROLOGIST ERIK MOLDSTAD Thursday - November 8, 2007 from Precision Forecasting (800)-624-0499

SUMMARY / DISCUSSION.... Good Morning... A broad upper level trough moving inland will bring cooler air into the Valley today and more cloudiness tonight and tomorrow. A weather system is expected to move inland Saturday evening and tonight bringing some rain to most areas. Following this system skies will clear up on Sunday with dry weather continuing Monday despite increasing cloudiness in the afternoon. More unsettled weather is possible next week but not much moisture is expected as the storm track stays north of our area... Erik
